USE OF QUOTATIONS

Researchers involved in this project may present findings from this study at professional conferences or in written publications. From time to time, it is useful to present short excerpts from participants' responses to help explain or illustrate certain concepts. Before using these excerpts, we will remove any identifying information such as specific names or locations.

However, we only use direct quotations from participants who have given their prior consent. Your consent to the use of specific quotations is voluntary; you may decline without penalty. Your responses will still be included in aggregated (group) results even if you don't consent to the use of quotations.

By agreeing to allow us to use excerpts from your responses at this time, you are providing "blanket" consent for any excerpts (you consent at this time to the use of any excerpts drawn from your responses), provided that the researchers omit identifying information.

Please indicate below which option you choose.

_____ Participant Name

_____ Participant Signature

_____ Date

☐

NO, please DO NOT use excerpts of my responses for presentation purposes.

☐

YES, the researchers may present excerpts of my responses at professional conferences or in publications, provided that identifying information such as names and specific locations are omitted.
